C. C. D. RADIO PLAN RELEASED

The F. C. C. has announced completion of plans for amateur participation in civilian defense communication. The plan has been given enthusiastic approval by the Indianapolis Civilian Defense Counsel and your E. C. has been requested to show the town what Amateur Radio can offer Indianapolis.

We must get our organization under way at once. A special meeting for this purpose has been called for Friday evening July 10th. All licensed operators, amateur or commercial, who can and will take part in this program are urged to be present at 8:15pm at the Indianapolis Radio Club Rooms, St. Clair and Olney Sts. Local activity will be under direction of Communications Coordinator Robert L. Batts of the Indianapolis Police Radio and Nelson Trusler, W9FOS, ARRL Emergency Coordinator. Consult your July QST for new F. C. C. rulings, be sure to attend the meeting Friday for details of the local plan. Be sure to contact your Emergency Coordinator N. B. Trusler, 442 North Randolph St., Phone Market 9709. BUT DO IT NOW!!!!!!

We need 30 stations on 2 $\frac{1}{2}$ meters - 7 of them fixed and all the portable and mobile equipment you can produce - and 100 operators to run the system.

Here's what we've waited five months for - now let's show 'em the local boys are live wires and really put this thing over. What say OM, CU Friday.

73's.

Trusler, W9FOS.
